

# Products

*Product information management > Common > Released products*

**Summary** Products are shared across legal entities and have attributes that are not company specific, such as a sizes, colors, and a product photo. Released products are company specific and contain attributes that relate to only one legal entity, such as unit of measure, taxation, and storage locations.

**Steps**

1. Create a Released product
2. Edit a Released product

**Tips**

- Creating a new Released product also creates the shared Product

# Create a Released product

- Choose **Product type** Item and **subtype** Product.
- Find an available **Product number** and **Item number**.
- Enter the **Product name**.
- Select the costing method in **Item model group**.
- Select the posting profile in **Item group**.
- Select inventory tracking attributes in **Storage and Tracking dimension group**.
- Choose the **Units of measures**.

**Movie 1.1** Create a Released Product

The screenshot shows the SAP Product Master - Create Product dialog box. The background window is titled "Released products (Unsaved filter)" and shows a list of product numbers. The dialog box is titled "Create product" and contains the following fields:

- Product type:** Item
- Product subtype:** Product
- Identification**
  - Product number:** 9027
  - Product name:** iPad - 64GB - White
  - Search name:** iPad64GBWhite
- Company-specific identification**
  - Item number:** 9027
  - Search name:** iPad64GBWhite
- Reference groups**
  - Item model group:** FIFO
  - Item group:** Computers
  - Storage dimension group:** SiteWarLoc
  - Tracking dimension group:** None
- Units of measures**
  - Inventory unit:** Pcs
  - Purchase unit:** Pcs
  - Sales unit:** Pcs
  - BOM unit:** Pcs
- Purchase taxation**
  - Item sales tax group:** ALL
- Sales taxation**
  - Item sales tax group:** ALL

At the bottom of the dialog box, there are buttons for "OK" and "Cancel". A mouse cursor is pointing at the "OK" button. There is also a link "Show fewer fields" and a checkbox "Generate variants automatically:".
